FOR IMMEDIATE RELEASE:

Document Technology Specialists, Inc. Expands Business Nationwide with New Technology Division

Cary, NC. – June 21, 2009 – Document Technology Specialists, Inc. (DTS, Inc), a leader in document workflow , imaging solutions and consulting services, announces their nationwide growth strategy with new partnership and technology division.

Document Technology Specialists, Inc. (DTS, Inc.), has solidified a strategic alliance with software developer, Ademero, Inc. of Tampa Florida, with plans to expand it's operations nationwide. The addition of this partnership to the DTS, Inc. offering allows the company to provide consulting and personalized document workflow and imaging solutions for Enterprise Content Management (ECM) and business process automation. Client benefits include efficiency increases with regulatory compliance and security initiatives in addition to potential reductions in document management expenses and processes. Short term business plans include an increase in the DTS, Inc. Cary-based workforce to keep up with demand, with several new positions expected to be added during the next year.

“Traditional paper document based companies are embracing the idea of electronic document creation, management and storage due to security and efficiency needs.” , states Ed Tucker, President of DTS, Inc. “The Ademero and DTS, Inc. partnership allows us to offer the best product solution that can be customized to fit a customer’s needs. It is an exciting time of growth for us and for our clients.”

DTS unique electronic document management tool, developed by Ademero, Inc., allows organizations to access information instantly and remotely, with the ability to manage it all from the security and convenience of a user-friendly web browser. The successful document management process starts with a consultative evaluation of a companies unique workflow, document strategy and information management needs. Open architecture in DTS’ software solutions, allows seamless migration of information from virtually all document management applications and file formats.

About DTS, Inc.

DTS, Inc was founded in 2004 by Ed Tucker, a veteran with over 26 years in the print services and office automation industry. Since the companies inception, Mr. Tucker has seen his business focus increasingly shift from the reduction in print and equipment costs to the creation of electronic information solutions which reduce or eliminate the need to create or store paper documents. Traditionally serving major universities, financial institutions, legal professionals and professional industries, DTS, Inc. has expanded it's offerings to virtually all industries which create, share and archive information.
